GOLDEN GIRL

THE strongest growing golden yellow Primulinus Hybrid we have ever grown, a real giant among the Prims.

This variety has a stem equal to the Gandavensis varieties, will open four and five flowers at a time; of deep golden yellow shade, and practically a solid color.

The bulblets are enormous and often bloom the first year.

The best stores of New York take every spike we cut and we never have been able to supply their wants in full. A wonderful commercial sort.
